There are many reasons to count people as they enter your store, your library, your museum, your restroom, your park, your building, your… And there are many ways to count these people. Some ways are as simple as making tick marks on a sheet of paper. Some are as complicated as installing hidden cameras throughout the area so that you can track people moving from here to there.

We believe the best people counters are those that are simple to buy, simple to install, simple to maintain, relatively accurate, reliable, and cost effective. We focus our efforts on ac-powered, infrared people counters that have proven their worth since 1986 – and battery operated, infrared people counters that have been available since 2005.

We are pleased to offer discounts on the following products for Access PA Members
Comments or Questions? Please contact Jennifer Mauphin at We Count People.

AccuraCounter - is an AC-powered stand-alone people counter, where you walk to the counter at the door to read the on-board display. You write down the number and reset the display. It comes fully assembled and wired and ready to count. The AccuraCounter will save its counts – even with loss of power. Discounted price of $299 per counter plus shipping.

TotalCounterIO – is a battery-operated, infrared beam-break people counter that is used in a standalone mode where you walk to the counter to read the total IN and total OUT counts from the display and reset to zero using a magnet. The TotalCounter I/O separates the counts as people enter and leave. Different from other counters, the TotalCounter uses standard 1.5 volt AA batteries instead of more expensive 3.6 volt lithium batteries. Discounted price of $359 per counter plus shipping.
